## DETAILED ACTION

### ***Allowable Subject Matter***

1. Claims 1-123 are allowed over prior art of record. The following is an examiner's statement of reasons for allowance: Murveit et al. disclose a method and system for fast on-line automatic speaker/environment adaptation suitable for speech/speaker recognition in the presence of changing environmental conditions, the method comprising acts of: performing front-end processing on an acoustic input signal, wherein the front-end processing generates MEL frequency cepstral features representative of the acoustic input signal (*see reference*); performing recognition and adaptation by: providing the MEL frequency cepstral features to a speech recognizer, wherein the speech recognizer utilizes the MEL frequency cepstral features and a current list of acoustic training models to determine at least one best hypothesis (*referring to reference*); receiving, from the speech recognizer, at least one best hypothesis, associated acoustic training models, and associated probabilities (*common in speech recognizer*); computing a pre-adaptation acoustic score by recognizing an utterance using the associated acoustic training models; choosing acoustic training models from the associated acoustic training models; choosing the best hypothesis as recognized words once the acoustic score ceases to improve; and outputting the recognized words (*referring to reference*). Murveit et al. fail to specifically disclose computing a post-adaptation acoustic score by recognizing the utterance using the adapted acoustic training models; comparing the pre-adaptation acoustic score with the post-adaptation acoustic score to check for improvement; modifying the current list of acoustic training

models to include the adapted acoustic training models, if the acoustic score improved after performing adaptation; performing adaptation on the chosen associated acoustic training models; and performing recognition and adaptation iteratively until the acoustic score ceases to improve;. Furthermore, it would have not been obvious to one of ordinary skill in the art at the time of invention to modify Murveit et al. in order to obtain the claimed invention. Therefore, claims 1-123 are allowed over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
